Career Objective

I love programming. I have been working as a professional web developer in Bangladesh for almost one year. I like programming. My favorite language is JavaScript. I have experienced all the expectations of web development using JavaScript technology. Every day I try to solve some problems using JavaScript. My main focus is to make the website mobile-friendly, SEO-friendly, browser compatible and coding in the most optimized way so that it performs well.

Technical Skills

- **Expertise** : JavaScript, ES6, React, HTML, CSS, React-Bootstrap, Bootstrap.
 - **Familiar:** Node js, Material UI, Express.js, MongoDB.
 - **Tools** : Vs Code, Chrome Dev tools, Firebase, Netlify, Heroku.
-

My Complete Project

❖ **Digital Service center** [Website](#) | [GitHub](#)

A single-page Electronics service application. Here admin and user are shown separately. The admin can add and remove any service if he wants and can see the user's order list. And the user will be able to book any service and see the booking list. I have added a payment method to this application.

In this application, I have used the following technology.

- **Front-End:** React.js, JavaScript, ES6, Stripe.js, Context-API, HTML, CSS, Bootstrap, FontAsowam, Spinner Loader.
- **Back-End:** Node.js, Express.js, MongoDB.
- **Tools:** GitHub, Firebase, Heroku.

❖ **Food Corner** [Website](#) | [GitHub](#)

A single-page food shop app. The administrator can add or remove any product if he wants and see the user's order list. And the user will be able to book any product and view the booking list and view the Lifetime Order History.

In this application, I have used the following technology.

- **Front-End:** React.js, JavaScript, ES6, Stripe.js, Context-API, HTML, CSS, Bootstrap, FontAsowam, Spinner Loader.
- **Back-End:** Node.js, Express.js, MongoDB.
- **Tools:** GitHub, Firebase, Heroku.

❖ **Bd Ride Share** [Website](#) | [GitHub](#)

A single car service application. Here the user will be able to find the car to go anywhere and see how many scales to go from one place to another.

In this application, I have used the following technology.

- **Front-End:** React.js, JavaScript, ES6, Context-API, HTML, CSS, Bootstrap, FontAsowam.
- **Tools:** GitHub, Firebase, Netlify.

Education

Studying BSC (Hon's) in Geography and Environment at Wali Newaz Khan College, Kishoreganj, Dhaka, Bangladesh.

Programming Course

Complete Web Development with Programming Hero
